

Episodio 13

- Se ordenan mediante la fecha los posts y se guarda la información de las páginas en cache para siempre.

Se modifica la función de retorno de la función all en el Post.php

```
return cache()->rememberForever('posts.all', function(){
    return collect(File::files(resource_path("posts")))
    ->map(fn($file) => YamlFrontMatter::parseFile($file))
    ->map(fn($document) => new Post(
        $document->title,
        $document->excerpt,
        $document->date,
        $document->body(),
        $document->slug
    ))
    ->sortByDesc('date');
});
```

Guardando post en caché

```
vagrant@webserver: ~/sites/lfts.isw811.xyz
vagrant@webserver:~/sites/lfts.isw811.xyz$ php artisan tinker
Psy Shell v0.12.4 (PHP 8.2.18 - cli) by Justin Hileman
